

For use in manual bar glass washing where heavy soils are encountered. Effective in all water conditions. Safe on hands, rinses freely with no soapy residue. Will not effect beer head.

Where To Use

Restaurants
Bars

Dilution

Use 1 tablespoon (½ oz.) per 2 gallons of hot water.

Directions

Start faucet to fill first sink compartment with hot water. While filling add Barfoam Powder directly into sink, powder should fully dissolve as sink fills. Place glass over brush and twist glass quickly while moving up and down. Be sure to contact all surfaces with the brush. Rinse and sanitize as usual. Mix new solution as water becomes dirty.
